I have to re-review because I think I forgot chemical information.

Thanks

I got tied up on an OPA case today. I quickly read through the action memo, but I want to look at it more thoroughly tomorrow and provide any comments. Susan, is it going to change significantly so that I should wait to review the updated version?

Amy/Susan:

Could you please review. I know the headings of how this is submitted is incorrect. Also, I know that the document may need to be fixed as the outline is not working properly but I think I have everything in it. If you can help with this I would appreciate.

The dollar amounts are drafts at this time so these will probably change.

Thanks
